COMPLIANCE

DATA SABRE 
HELPING YOU TO MAKE **WATER SAFER**

WORKING WITH HEALTHCARE AND INDUSTRY FOR **SAFER WATER**

DataSabre is a new software application which enables secure auditable recording and collation of microbial water test results, with comprehensive management and tracking of remedial actions.

Whether you carry out legionella/pseudomonas testing in-house or use contractors, demonstrable management and control of results data is an important compliance requirement for ACoP L8 and HTM-04.

- Central repository for all testing records
- Visual asset hierarchy shows each testing point
- Assign multiple tests to any asset
- Set up schedules for each test type
- Filter and compare test results
- Quickly identifies over- or near-due tests
- Can trigger alerts to designated personnel
- Dashboard of reports to show compliance
- Straightforward to use
- Available as a hosted service
- Supported by a UK-based helpdesk
